## **INSTRUCTION MANUAL**

## **SPECIFICATIONS:**

1. Power supply: 9V~24VDC 2. Frequency: 433.92 MHz

3. Rolling code and Fixed code, 4. 2 channel

5. Maximum storage: 400 codes 6. 94mm\*60mm\*28.5mm

| ANT | Receiver Antenna |
|-----|------------------|
| CH1 | Relay Output 1   |
| CH2 | Relay Output 2   |
| V+  | Voltage +        |
| GND | Ground           |

## **PROGRAMMING:**

1. Learning transmitter's codes:

Press "learn 1" or "learn 2" button – Learn LED will go on. Then press the button which you wish to learn on your remote control. Learn LED will start blinking and go off – This means that you have successfully learned your remote to the receiver.

- · Repeat the above steps for other transmitters.
- 2. Erasing transmitter's codes:

Press "learn 1" or "learn2" and keep holding until Learn LED will go off – Once Learn LED is off, it means that you have successfully erased the memory of the appropriate channel.

## **FEATURES:**

- 1. Two-way control, Relay contact output, Relay the greater flow rate of 2A
- 2. Can identify HS1527, PT2262, HCS301, HS2240, MIE, CAME remote controls and so on .
